TritiumCalendarCombo

Pick a date from a drop-down month calendar without leaving the form.

Install

TritiumCalendarCombo is part of Tritium UI for .NET MAUI. Add the package source from your license to your NuGet configuration, then restore from there. These packages are not on the public NuGet Gallery.

The URL below is a placeholder. Replace it with the package source on your license. This site does not publish that URL.

```
<?xml version="1.0" encoding="utf-8"?>
<configuration>
  <packageSources>
    <add key="TritiumApps" value="FEED_URL_FROM_YOUR_LICENSE" />
  </packageSources>
</configuration>
```

Reference the package on your license that includes TritiumCalendarCombo.

Platforms

Android, iOS, Mac Catalyst, and Windows 10 version 19041 and later (.NET 10 MAUI).

Basic example

Declare this namespace on the page.

```
xmlns:sched="clr-namespace:Tritium.Maui.Scheduler;assembly=Tritium.Maui.Scheduler"
<sched:TritiumCalendarCombo SelectedDate="{Binding Day}"
                        FirstDayOfWeek="Monday"
                        DateSelected="OnDateSelected" />
```

Features

• Show the selected date in a read-only box and open a month grid.
• Bind SelectedDate two-way.
• Limit choices with MinDate and MaxDate.
• Start the week on the day you choose.
• Raise DateSelected when the user picks a day.
• Bind it to a scheduler's selected date so both stay in step.

Main API

• **SelectedDate.** The chosen day, two-way.
• **IsOpen.** Whether the month popup is open.
• **FirstDayOfWeek.** The weekday shown in the first column.
• **DateSelected.** Fires with the newly selected date.

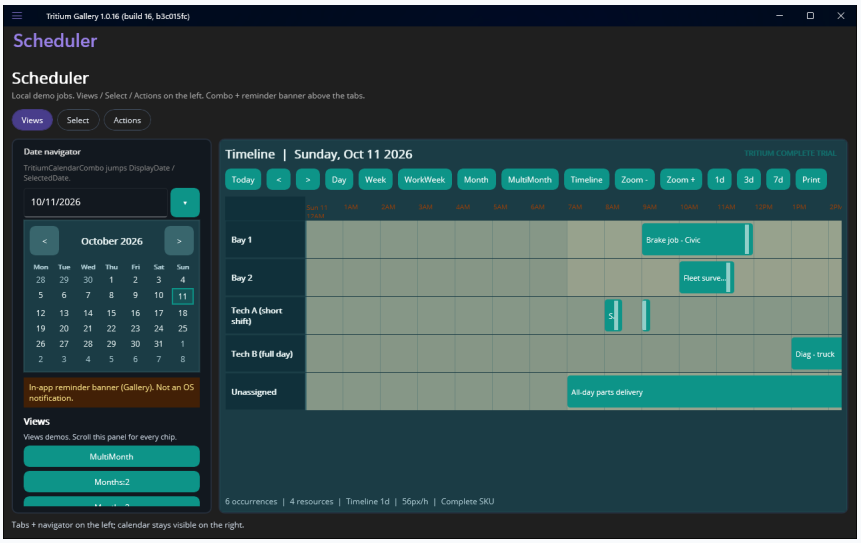

Accessibility

- Give the control a visible name on the page, the same way you label any .NET MAUI view.
- Pick theme colors with a clear difference between the text and the surface behind it. The theme packs do not add a separate contrast mode. The difference comes from the colors you choose.
- Do not use color as the only way to tell two states apart.
- Try the page with the platform screen reader on Android, iOS, Mac Catalyst, and Windows.
- Keyboard access follows the .NET MAUI view. Check the control on each platform you ship.

Tips

- Restore TritiumCalendarCombo from the package source on your license. These packages are not on the public NuGet Gallery.
- Reference the package on your license that includes TritiumCalendarCombo.
- Target frameworks are net10.0-android, net10.0-ios, net10.0-maccatalyst, and net10.0-windows10.0.19041.0. Minimum OS versions are Android 21, iOS 15, Mac Catalyst 15, and Windows 10.0.17763.
