Install

The URL below is a placeholder. Replace it with the package source on your license. This site does not publish that URL.

    <add key="TritiumApps" value="FEED_URL_FROM_YOUR_LICENSE" />
  </packageSources>
</configuration>
```

Basic example

Declare this namespace on the page.

xmlns:editors="clr-namespace:Tritium.Maui.Editors;assembly=Tritium.Maui.Editors"
<editors:TritiumSignaturePad x:Name="Pad" HeightRequest="200" StrokeWidth="2" />
```

Features

• Draw one or more strokes on the pad.
• Set the ink color and stroke width.
• Read IsEmpty before you accept the form.
• Clear the pad from a button.
• Export the strokes to a PNG stream at a chosen size.
• Opt in to haptic or sound feedback with the other editors.

Main API

• **StrokeColor.** Ink color.
• **StrokeWidth.** Ink thickness.
• **IsEmpty.** True when the pad has no strokes.
• **ToPngStreamAsync.** Renders the signature to a PNG stream.

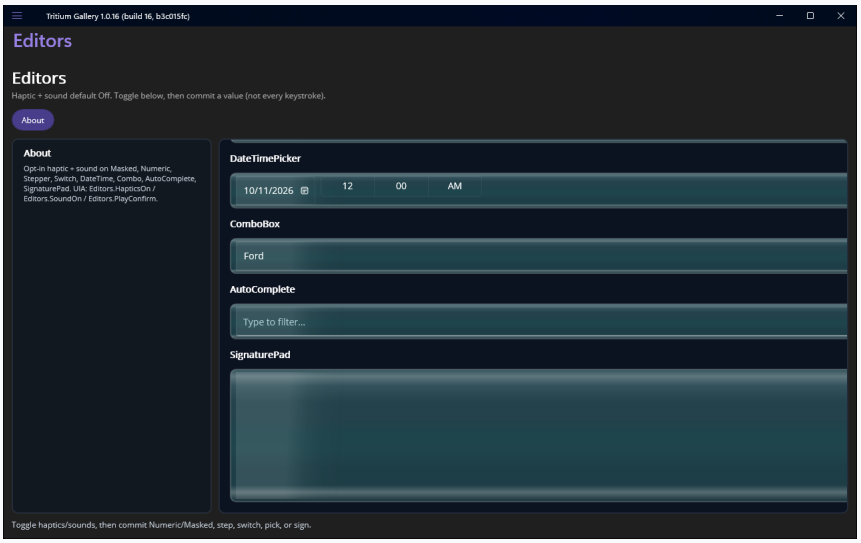

Accessibility

- Give the control a visible name on the page, the same way you label any .NET MAUI view.
- Pick theme colors with a clear difference between the text and the surface behind it. The theme packs do not add a separate contrast mode. The difference comes from the colors you choose.
- Do not use color as the only way to tell two states apart.
- Try the page with the platform screen reader on Android, iOS, Mac Catalyst, and Windows.
- Keyboard access follows the .NET MAUI view. Check the control on each platform you ship.
